

## DISCLOSURE STATEMENT

July 9, 2015

To the Editorial Board of the American Economic Journal: Microeconomics:

This is to affirm that I have no conflict of interest related to this article:

*Incomplete Disclosure: Evidence of Signaling and Countersignaling (AEJMicro-2015-0178)*

This work was funded by a grant from the Alfred P. Sloan Foundation (#2011-10-14). Those funds enabled the University of Maryland to employ me as a graduate research assistant from January 2012 to August 2014, working on this project. The data are from restaurant inspection records made publicly available for free by the government of Maricopa County, Arizona. Neither I nor any close relative or partner of mine is an officer, director, or board member of any relevant non-profit organization or profit-making entity. However, I am a co-founder, technical advisor, and stockholder of Hazel Analytics, a corporation that is helping to disseminate restaurant inspection data from many health departments, and that intends to sell services in the future that use that data. To the best of my knowledge, no outside party had the right to review this paper prior to its submission.

Feel free to contact me if you have any questions.

Sincerely,

Alexander J. Quinn  
Assistant Professor
