“Where Does Multinational Investment Go with Territorial Taxation? Evidence from the UK”

This research was initiated when I was a senior research fellow at the Centre for Business Taxation prior to moving to the International Monetary Fund. An early version of this paper received financial support from a research grant from the European Tax Policy Forum. While the current version of this paper is published as an IMF working paper, the views expressed in this paper are those of the author(s) and do not necessarily represent the views of the IMF, its Executive Board, or IMF management.

This project does not include material that requires IRB approval.
