Voting Rights in the U.S.

- At birth:
 - ▶ States defined qualifications for having the right to vote
 - ▶ Most states enfranchised only white men
 - Most states had property or tax payment qualifications
 - Vermont enfranchised all adult men from the beginning
- Pre Civil War: Over time, suffrage expanded as states got rid of property/tax qualifications.
- Post-Reconstruction: The federal government established some voting rights.
 - ▶ All adult men (15th Amendment, 1870)
 - ▶ Women (19th Amendment, 1920)
 - ▶ D.C. residents (23rd Amendment, 1961)
 - ▶ Poll tax (24th Amendment, 1964)
 - ▶ 18 year olds (26th Amendment, 1971)

Post-War Disenfranchisement and Re-Enfranchisement

- Disenfranchisement of blacks in the South
 - ▶ State by state
 - ▶ Began 1877
 - ▶ Poll tax, literacy tests
 - ▶ Selective enforcement
 - ▶ Shotgun policy
- Voting Rights Act of 1965
 - ▶ Ended voting restrictions
 - ▶ Required pre-clearance for states/counties with suppression history

Recent Development

Some states have passed laws which :

- Voter ID
- Reduction of [early voting](#)
- Restrictions on voter registration
- Absentee ballots
- Disenfranchisement of ex-felons

Recent Development

Shelby County v. Holder (2013)

- The Voting Right Act of 1965 had provisions authorizing the federal government to block discriminatory changes of voting rules in covered areas.
- The Supreme Court struck down these provisions in 2013.
- Within 2 weeks of the Court Decision, Many Impacted States Passed Laws Restricting Voting:
 - ▶ AL, AZ, NC, OH, SC, TX, WI

States With New Voting Restrictions Since the 2010 Election

(Figure: Brennan Center for Justice, NYU Law School)

Early Voting

- Election day is a Tuesday and not a holiday.
- Early in-person voting allows people to cast ballots in-person before election day
 - ▶ Early voting availability depends upon state policy
 - ▶ Some states allow counties discretion
 - ▶ Number of early voting days range from 0 to 46
- 1/3 of U.S. and OH voters voted early in 2012
- Democrats rely more on early voting.

This Paper

- We investigate how changes in early voting availability in Ohio affected turnout and partisan outcomes.
- Why early voting?
 - ▶ Within state, cross county variation in early voting.
 - ▶ No within state variation in laws for photo ID, registration, and absentee balloting.
- Why Ohio?
 - ▶ Large variation in roll out of early voting cross counties.
 - ▶ In 2012, OH laws homogenized early voting across counties.
 - ▶ Further uniform reduction of early voting was enacted in 2014.

De Facto Enfranchisement Matters

Related Literature:

- County level diff-in-diff studying the impacts of Voting Right Act of 1965 (Cascio & Washington, 2013)
- Black disenfranchisement in the post-reconstruction South using state-border county pairs (Naidu, 2012)

Policy Determinants of Turnout

Related Literature:

- On Photo ID laws (Erickson & Minnite, 2010):
 - ▶ State level Diff-in-Diff with demographic controls
 - ▶ Good individual controls but state level selection and small sample (CPS)
 - ▶ Household survey => self-reported turnout => too high
- On voting technology (Card & Morretti, 2007):
 - ▶ Uses cross-county variation
 - ▶ Assumption that introduction of new technology due to HAVA Act uncorrelated with voting trends

Early Voting Effects

Prior Literature:

- Using cross-state variation, Burden et al. (2014) find that early voting, though convenient, decreases voter turnout.
- Using time-series variation in Florida, Herron & Smith (2014) find that reduction of early voting lowers turnout.

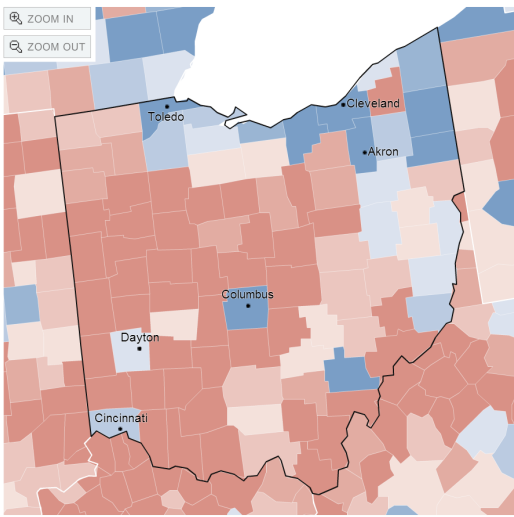

Our Contribution

- Empirical challenge:
 - ▶ How to construct appropriate control groups.
- We geocode registered Ohio voters and exploit the spatial discontinuity in early voting to credibly identify the effects of early voting:
 - ▶ On turnout
 - ▶ On partisan vote composition
 - ▶ By gender, race, and age.
 - ▶ By type of day (weekend, days open late, others).
 - ▶ We simulate impacts of standardizing early voting nationwide.

- State winners
- County bubbles
- County leaders
- Voting shifts

Year

'08 '04 '00 '96 '92

Ohio

20 electoral votes

100% reporting

Candidate	Votes	Pct.	party
✓ Barack Obama	2,708,685	51.2%	Dem.
John McCain	2,501,855	47.2%	G.O.P.
Other Candidates	84,946	1.6%	Other

• [Full Ohio results >](#)

2008 presidential vote share margins in Ohio counties (figure: New York Times)

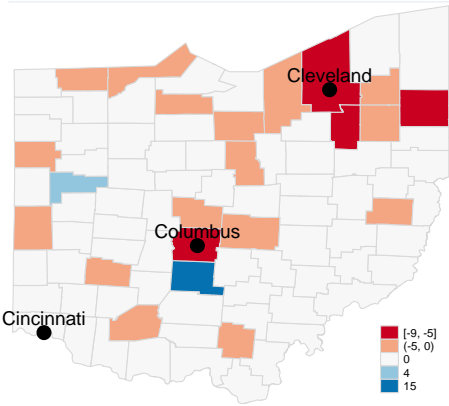

Ohio: Swing State

- Obama won by narrow margins in 2008 and 2012.
- However, **Republicans** control both houses of the state legislature, as well as the governorship (John Kasich).

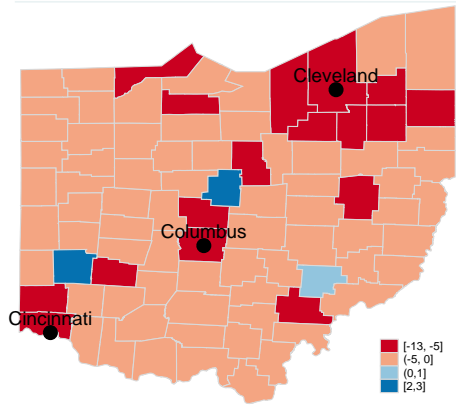

Changes in Early Voting Days

2008 - 2012

2010 - 2014

Data

- Universe of Ohio registered voters:
 - ▶ 7.6 million
 - ▶ Name, birth date, registration date, address, party, voting precinct, voting history since 2000
 - ▶ We geocode the addresses.
- Locations and opening hours of early voting sites from OH Secretary of State & county election commissions.
- 2010 Census demographics (block group)
- TIGER/Line GIS files of county & block group boundaries.
- Precinct level vote shares of candidates

Empirical Approaches

- Difference-in-Differences
 - ▶ County fixed effects
 - ▶ Individual fixed effects
- Spatial Discontinuity
 - ▶ County borders subsample with individual fixed effects
 - ▶ Fixed effects of 1×1 mile grids straddled over two counties.

Specification: County Fixed Effect

$$V_{it} = \beta D_{it} + \mu_t + \phi_c + \epsilon_{it}$$

V_{it} : dummy variable equal to one if individual i voted in year t ; zero otherwise.

D_{it} : number of early voting days

μ_t : year fixed effect

ϕ_c : county fixed effect

t : 2008, 2010, 2012, 2014.

	2008 - 2012 Changes in Number of Days			2010 - 2014 Changes in Number of Days		
	All	+ / -	Mean	All	+ / -	Mean

White (%)	83.0	+	87.9	82.7	+	90.8
		-	75.4		-	72.3
Democrat (%)	30.4	+	27.4	28.6	+	26.4
		-	35.1		-	31.3
Independent (%)	43.1	+	42.4	46.6	+	44.7
		-	44.1		-	49.0
Republican (%)	26.5	+	30.2	24.8	+	28.9
		-	20.8		-	19.7
College Grad. (%)	25.2	+	22.5	25.0	+	20.9
		-	29.3		-	30.3
HS Dropout (%)	12.0	+	12.4	12.2	+	12.5
		-	11.5		-	11.8
Med. Household Income	53.7	+	52.8	53.4	+	51.5
		-	55.1		-	55.8
Observations	6,559,589	+	3,998,136	7,597,048	+	4,257,198
		-	2,561,453		-	3,339,850

Specification: Individual Fixed Effect

$$V_{it} = \beta D_{it} + \mu_t + \delta_i + \epsilon_{it}$$

V_{it} : dummy variable equal to one if individual i voted in year t ; zero otherwise.

D_{it} : number of early voting days

μ_t : year fixed effect

δ_i : individual fixed effect

t : 2008, 2010, 2012, 2014.

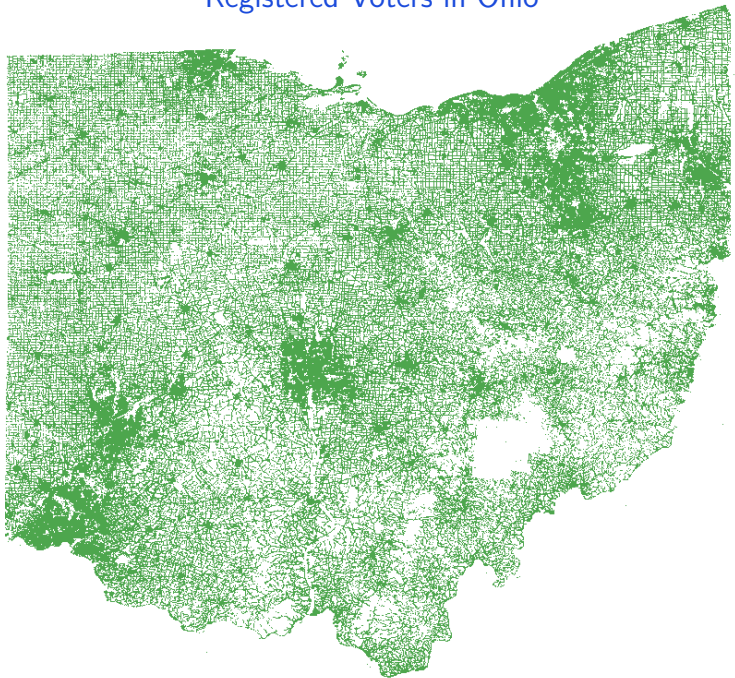

Empirical Approaches

- Difference-in-Differences
 - ▶ County fixed effects
 - ▶ Individual fixed effects
- Spatial Discontinuity
 - ▶ County borders subsample with individual fixed effects
 - ▶ Fixed effects of 1×1 mile grids **straddled** over two counties.

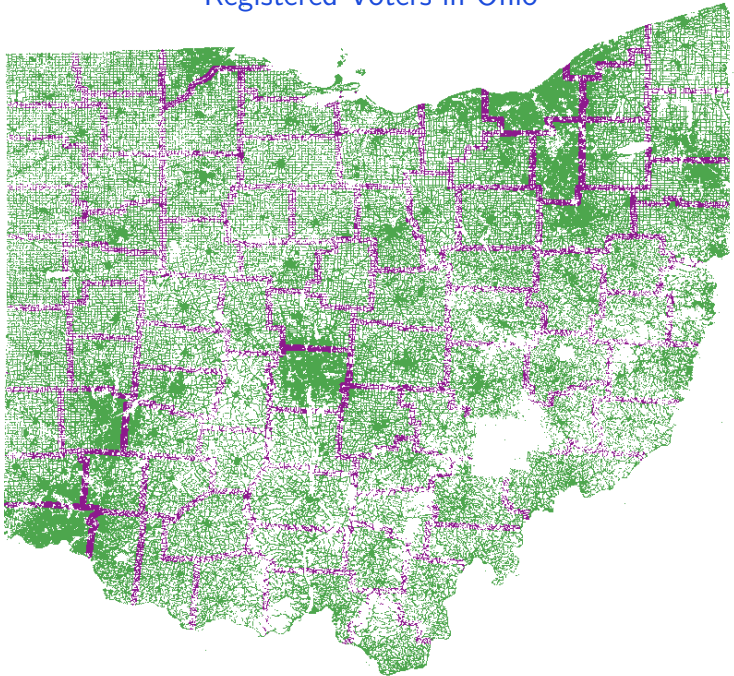

County-Border Sample

- Geocode 7.6 million Ohio addresses
- Calculate distance to the nearest county border
- Retain individuals who are within 1 mile (≈ 1.6 km) of county borders.

Registered Voters in Ohio

Registered Voters in Ohio

County-Border Sample, 1×1 Mile Fixed Effect

4-Year Differencing:

$$\Delta V_{it} = \beta \Delta D_{it} + \Delta \mu_t + \Delta f_t(x_i, y_i) + \Delta \epsilon_{it}$$

$$\Delta V_{it} = V_{it} - V_{i,t-4}$$

$$\Delta D_{it} = D_{it} - D_{i,t-4}$$

$\Delta f_t(x_i, y_i)$: election-type specific 1×1 mile area fixed effect

(x_i, y_i) : longitude-latitude of individual i

t : 2012, 2014.

Aggregate Effects: Ohio

- Change in total votes cast $\left(T_e = \sum_c \beta_e \mu_{ce} R_c\right)$:

Presidential : -45,225 (-0.82%)

Midterm : -61,642 (-1.96%)

- Republican vote share $\left(V_{pe} = \frac{T_{De} + T_{Re} + T_{Ie}}{Turn_e},\right.$
where $T_{pe} = \sum_c \beta_{pe} \rho_{pe} \mu_{ce} \omega_{pce}, p = D, R, I$):

Presidential : +0.36 percentage points

Midterm : +0.51 percentage points

Changes of Republican Seats and Electoral College Votes
under Hypothetical Standardized Early Voting

Election Type	Year	Observed Republican Seats / Electoral Votes	Standardized Early Voting		
			0 Days	23 Days	46 Days
President	2012	332/538	0	0	-15
President	2016	304/538	10	-65*	-75*
Senate	2012	51/100	1	-1*	-1*
Senate	2014	54/100	0	0	0
Senate	2016	52/100	0	-1	-3*
House	2012	234/435	5	-4	-10
House	2014	247/435	0	-1	-2
House	2016	241/435	1	0	-3

Notes: * indicates a change of seats or electoral votes resulting a change of majority.

Concluding Remarks

- Restrictive voting laws affect voter turnout.
- Our estimates capture the net effects accounting for the incomplete substitution among different voting methods.
- Reduction of early voting has larger impacts on:
 - ▶ Voters of child bearing ages
 - ▶ Female
 - ▶ Independents & Democrats
- Nationwide standardized provision on early voting could have non-negligible partisan impacts.
