Readme for Data and Code Files

"Compliance Behavior in Networks: Evidence from a Field Experiment"

Francesco Drago, Friederike Mengel and Christian Traxler

The zip file contains the data and the programs to replicate the empirical results in "Compliance Behavior in Networks: Evidence from a Natural Experiment".

The dataset "Networks_50.dta" and the code "Networks_Part01.do" replicate the tables and figures in the paper and in the online Appendix B with the exception of Table 4 and Table B1.

The datasets "Networks_z.dta" with z = [25, 75, 100, 250, 500, 1000, 1500, 2000] and the code "Networks_Part02.do" replicate Table 4 in the paper and Table B1 in the online Appendix B.

The dataset "Networks_survey.dta" and the code "Networks_Part03.do" replicate the tables in the online Appendix A. The do files can be run independently and in any sequence.

The dataset are stored in STATA version 14 format and programmes are in Stata-language (*.do).
