

**Disclosure statement by Roger Myerson for "Game Theory and the First World War."**

My work on this paper was done as part of my normal academic research at the University of Chicago, where I am the David L. Pearson Distinguished Service Professor of Global Conflict Studies at the Harris School of Public Policy and the Griffin Department of Economics. This professorship is associated with the Pearson Institute for the Study and Resolution of Global Conflicts, and I have indeed tried in this paper to advance our understanding of global conflicts, with hope that such understanding may help create a safer and more peaceful world. I have not been supported by any other consultant fees, retainers, or grants during my work on this paper.
