Figure A.1. Spatial Distribution of UK Subsidiaries

*Notes:* This figure shows the distribution of UK-owned affiliates in the EU-27 countries. Numbers in the square brackets refer to the five quantiles of the sample distribution.

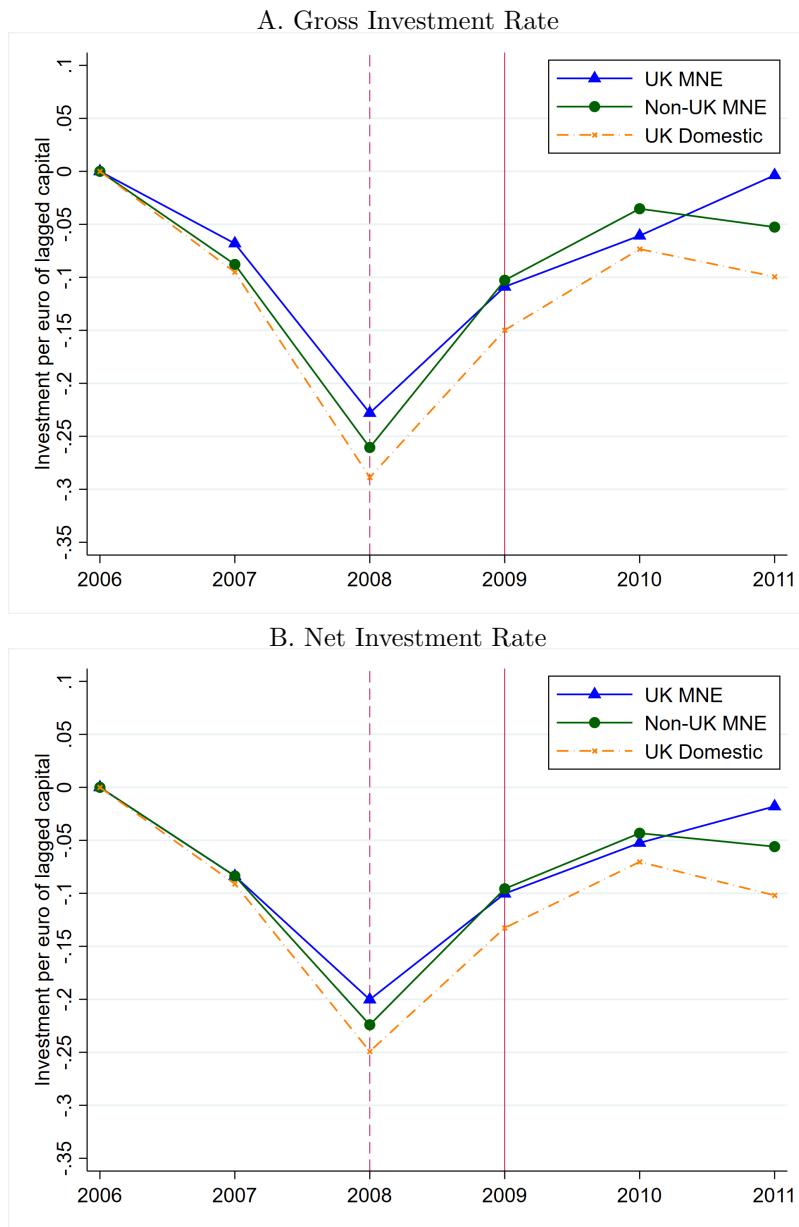

Figure A.2. Graphical Evidence on Investment in the UK

*Notes:* The figure plots the average gross investment rate from 2006-2011 for UK MNC affiliates, UK affiliates of domestic company groups, and non-UK multinational affiliates in the UK. The solid vertical line depicts the year the exemption system was introduced, and the dashed vertical line depicts the year the policy reform was announced.

*Notes:* The country in each row refers to the host country where the multinational affiliate is located. The country/region in each column refers to the home country/region where the ultimate parent of the multinational affiliate is located. The dataset consists of two samples for empirical analysis: (1) the sample for MNC affiliates in the low- and high-tax countries outside the UK, and (2) the sample of MNC affiliates in the UK.

*Notes:* This table reports difference-in-difference estimates of the effects of the 2009 dividends exemption on other firm-level outcomes in the high-tax countries. Compensation is the average company wage and salary per worker, productivity is the total output per worker, and profitability is the EBIT relative to total output. Heteroskedasticity-robust standard errors clustered by firm are shown in parentheses below the estimated coefficient.
